Package Cement / Mason Sand

**High Strength Masonry Cement:** High Strength Masonry Cement can be used for all facets of masonry construction, including concrete block, decorative stone and brick.

**Portland Cement Type 1:** Type I is a general purpose cement widely used in all types of concrete construction. Typical applications include slabs-on-grade, curbing, foundations, paving and floors.

**Portland Cement Type 2:** Type II is formulated to give excellent durability in construction jobs that may require the concrete to withstand exposure to harsh environmental conditions.

**Stucco Cement:** Stucco Cement provides a smooth, workable mix that retains good consistency and develops a strong bond. This product can also inhibit moisture penetration.

**Type "N":** Type "N" Masonry Cement is a general purpose product specifically designed for use in above-grade applications with products such as clay brick, glass block and stone.

**Mason Sand Bags**  
1 Cubic Yard (2700 lbs.) of mason sand that can be used for any and all masonry work. Mason Sand Bags can be delivered along with block and other masonry accessories to arrive on the same truck at the same time to the jobsite.
